You probably realize this but we're trying to be very careful not cause any issues between Amphenol and the EPA, between the agencies or with the public. That's why we keep asking for clarification on what may seem to be clear instructions. It seems to be a very tenuous situation all around and there are times we're not sure what we can say or to whom we can say it so we will ask a lot of questions.

Also, there may be times when, in an effort to get out in the field and be proactive, we believe we've got EPA buy in even though you still have some questions or concerns.

No, that is not what I meant. Response plan = mitigation system.

Please talk to the owner/tenant about the mitigation system.

Also, prepare a letter to them describing the results and system and provide it to us as a draft.

Let's talk about this if you have more questions.

Thanks.

Carolyn

Carolyn - just to be clear, it is okay to talk to the owner/tenant but not talk about the mitigation system until you see a letter describing it?

Hi –

1. Bhooma and I went over the results and the response plan we discussed yesterday. All good to talk with property owner and resident about results and response plan

2. For EPA review, please prepare a draft letter to owner/resident describing the mit system, ok to describe as a pre-emptive approach based on S-S results
3. Good to go also with contacting additional homeowners for access. I didn't mean to be ambiguous about that.
4. Sewer WP not yet approved. Bhooma is looking it over today. I talked with Brad about my concerns this morning. I expect to prepare conditional approval later today.

Carolyn

Carolyn - I didn't get the feel that you were ready for us to contact the property owner and resident at [REDACTED] or start talking to the other 8 locations about access. Before I turn Brad's team loose (and they are ready to go today) I wanted to confirm that we're good to talk to these folks. At least, could we start contacting the 8 locations about access even if you wanted to hold off on [REDACTED] now? Thanks.

Also, looking to be going into sewer manholes today if we have your okay. If we want to sample this week, we have to start the process today. Thank you.
